SHOCK ABSORBERS

7TH EDITION

ULTIMA SHOCK ABSORBERS	TELESCOPIC	SEALED STRUT	CARTRIDGE STRUT INSERT	SUSPENSION UNIT
GAS CHARGED NEW MULTI DISK VALVING	26 TOURING GAS 31 GAS 36 GT GAS 40 HD GAS 46 SUPER XHD GAS	65 GT GAS	34 GT GAS	36S S/S SHOCK ABSORBER WITH SPRING SEAT GT GAS
HYDRAULIC NON CHARGED	35 HD	64	33	35S S/S SHOCK ABSORBER WITH SPRING SEAT
HEAVY DUTY STEERING DAMPENERS	27H			

Hydraulic units are used in various applications where Research and Testing has proven ride and handling qualities are superior to Gas Charged Units.
ALL SHOCK ABSORBERS CONTAIN OIL

GAS CHARGED	Gas pressurisation provides excellent road handling over a wide range of applications for both passenger, light delivery vehicles, 4 wheel drive applications and some commercial vehicles.
HYDRAULIC	Meet or exceed Original Equipment Specifications. These units are used on some commercial and 4 wheel drive applications.
HEAVY DUTY	High capacity for normal or extreme use. Excellent ride and handling qualities. Superior ride and handling on 4 wheel drive applications.
SUPER XHD	For Extreme Use 40mm Piston, 20mm Shaft, Reservoir Shielded for Protection

When fitting Struts to Front Wheel Drive cars, check the condition of the CV joints and Boots.
 Failure to advise of problems in this area can cause poor Customer Relationship.
 Refer your AAP Stockist for replacement parts.

All Shock Absorbers, Struts and Cartridges in this Catalogue use a technically advanced Valve System, and are not RIDE HEIGHT sensitive. This eliminates the necessity to carry several Part Numbers for each application, and allows the use on lowered or raised vehicles, provided the travel meets the specifications required.

IMPORTANT: PLEASE READ TECHNICAL INFORMATION WHEN NOTED.

Superior ride & handling qualities are obtained by using especially developed Bump and Rebound settings.

3 Lip Piston Rod Seal

Seamless Shock Absorber Eyes Electric and Fusion Welded, Large Diameter Piston Rods Double Chrome Plated to Absorb the High Side Loads Placed on Modern Shock Absorbers. High Performance Good Quality Rubber Bushes Developed After Many Years of Severe Testing. This Eliminates the Necessity to Resort to Using Polyurethane Bushes with its Many Ride and Noise Problems.

Some Units use very low gas-pressure to obtain good ride qualities and retain maximum performance.

IMPORTANT INFORMATION - PLEASE READ

ALL APPLICATIONS

Unless otherwise stated, all applications listed in this catalogue are for vehicles in their standard state for the model indicated (as produced by the manufacturer) in particular in regards to Suspension height and features. Guidelines have been given to aid selecting Shock Absorbers for some models that commonly are lowered or raised, but particular caution must be taken by the person fitting Shock Absorbers to any lowered or raised vehicles to ensure safe operation. (See next paragraph)

LOWERED OR RAISED VEHICLES

When Guidelines have been given to aid selecting Shock Absorbers for some lowered or raised vehicles, it is the responsibility of the person fitting the Shock Absorbers to ensure their suitability for the particular application they are being put to. This must be the case because of the number of variables that can be different on a vehicle yet the distance lowered or raised can be the same. In particular, the fitter must ensure coil springs remain captive in their seats when the suspension is on full droop, but also that any springs are not over extended or worked consistently in a position that is in an unsafe range, that the suspension can't excessively or dangerously bottom, that brake hoses are not over extended, that suspension and transmission joints are not being consistently worked in a position that is an unsafe range, and any other vehicles components affected are still working within safe range.

LISTING OF MODELS

All models listed in the catalogue are done numerically/alphabetically including Commercial Vehicles. Models identified by numbers come before those with names only.

IF YOU CAN'T FIND YOUR VEHICLE

If you can't find your vehicle, please contact your supplier as there may be some vehicles that appear in the international catalogue which aren't in this Australian version (particularly if it is a European vehicle), and failing that with a few accurate specifications we will probably be able to supply you a suitable Shock Absorber anyway. If your vehicle is new or not common we would also like to know so we can include it in the future editions.

IF YOU HAVE FOUND AN ERROR

We obviously have tried to make sure everything in our Catalogue is accurate, but can't guarantee that there are no mistakes at all. If you find what you believe to be an error please let us know.

PHONE: (02) 4965-9401 or (02) 9738 1611

MOBILE: 0438 269 629

EXPLANATION OF SYMBOLS, CODES & ABBREVIATIONS USED

RAISED SPRINGS:

Recommended to be used when raised springs are fitted.

NUMERICAL LISTINGS:

Are a guide only. Check application in catalogue.

MANUFACTURERS:

Names, Part Numbers, Symbols or other references appearing in the Master Cross Reference, packaging or Catalogue are used for reference purposes and in no way to indicate the goods are made by, for, or guaranteed to such manufacturers.

A =AVAILABLE REFER NUMERICAL LISTINGS

FORD TECHNICAL ADVICE					
T/A 1	Check the external length of the rear Shock Absorbers. If the extended length is 493mm use Part Numbers 360006 & 400719. If 569mm use Part Numbers 360081, 355425 & 400425.				
T/A 2	When Fitting Part Numbers 360090,360091,40090,40091 the rear Springs must be replaced if the vehicle is fitted with Ford Self-levelling System. It will then revert to Standard/Lowered. When carrying out this modification, remove the Self-levelling warning light fuse. For correct Springs refer Selby Spring Catalogue.				
T/A 3	Rear Shock Absorbers Part Numbers 360090,360091,400090,400091 include HD Bump Stops. The lower mounting bolts should be tightened to 8nm or noise will appear.				
T/A4	Check Position of Bracket for Sway Bar Link Ball Joint if Approx 110mm From Spring Seal Can Use Old or New Link e---if Approx 25mm Must Use New Link Supplied				
T/A 5	Always check the extended and compressed lengths of all F Series 4 Wheel Drive Shock Absorbers.				
T/A 6	36S001R/002L, 36S005A & 36S007A are Short-Bosied Shock Absorbers recommended for standard, Low and Super-low vehicles and are not recommended for raised vehicles.				
T/A 7	Front Struts Part Numbers 65247R & 65248L have short bodies to allow the vehicle to be successfully lowered.				
T/A 8	360739 is a Short Version of 360350 & 360350S and should only be used on Super Low Vehicles. It is advisable to have vehicle checked by a suspension specialist.				
T/A 9	360076 is a Short Version of 360081 and should only be used on Super Low Vehicles. It is advisable to have vehicle checked by a suspension specialist.				
T/A 11	36S001R/002L have ABS brackets and will fit all models as per catalogue.				
T/A13	Two Shock Absorbers are fitted to each side.				
T/A 14	36S005A is fitted with a Brake Pipe Bracket and can be used on all models as per catalogue.				
T/A 16	Check Vehicle was manufactured with Non-Adjustable Suspension. If converted previously refer :- To replace Adjustable Suspension.				
T/A 17	This Part Number is supplied with a new Bump Stop. Bump Stop is available as a separate item.

HOLDEN

APPLICATION MAKE AND MODEL	YEAR	FRONT	NOTES	REAR	NOTES
HOLDEN TECHNICAL ADVICE					
T/A 1	Lower Clevis Bolts should be replaced and not re-used. Only tighten to Manufacturers specifications after Wheel Alignment has been adjusted. Clevis Bolts are supplied with Part Numbers 65001R, 65002L, 65003R & 65004L, 65006R, 65007L which are manufactured with shortened bodies and are recommended for Standard, Lowered, and Super-Low vehicles. NOT recommended for raised vehicles. Hi-Tech Bump Stops are supplied and should be used.				
T/A 2	When Lowering Commodore Utes, models with Beam Rear Axle it may be necessary to cut the Bump Stops or fit replacement Poly-units to avoid the vehicle sitting on the Bump Stops.				
T/A 3	If Part Numbers 360350 & 400350L are too large in diameter, it may be necessary to enlarge the hole in the Lower Wish-bone, or use Part Number 360350S. 400350 = 65mm diameter, 360350 = 43.6mm diameter, and 360350S = 33mm diameter.				
T/A 4	Before fitting, check for tyre clearance problems. If clearance problem exists, use 65004L & 65003R				
T/A 5	Check the length of Front Shock Absorbers on late model Rodeo 4WD 360195 & 400575 are 380mm Extended, 400016,600017 410mm Extended				
T/A 6	65003R/65004L Raises the Vehicle height by approx 10MM, replacement Springs are required to maintain original height.				
T/A 7	Use Sway Bar Lings Part Number SL651 RH, SL652 LH to adapt fitment to earlier models with Ball Joint on Sway Bar. Links have Ball Joints Both Ends				
T/A 8	Vehicles with Torsion Bar Front Suspension. Length of Shock Absorber must be checked as it is difficult to know correct fitment. EXT, 360081, 355425, 400425 are 567MM EXT.

MAZDA TECHNICAL ADVICE					
T/A 3 Part Number 360350 & 360350S. It may be necessary to deepen the mounting holes in the Lower Cross Pin. If 360350 is too large in diameter use 360350S					
T/A4 Check Position of Bracket for Sway Bar Link Ball Joint,if Approx 110mm from Spring Seat Use Old or New Link,if Approx 25mm Must Use Link Supplied					
T/A 5 This Part Number is manufactured to convert to Non-Adjustable Suspension. If the Springs are in good condition it is not necessary to replace.

MITSUBISHI TECHNICAL ADVICE					
T/A 1 Strut noise from Cordia, Magna & Verada models. If there is insufficient clearance between the Spring and the Inner Guard, it is caused by incorrect alignment of the Upper Spring Plate/Bearing Carrier.					
T/A 2 Supply 2-16 mm Inside Diameter Washers when fitting 360081					
T/A 3 When replacing struts that have no keyway on the piston rod (EG: MR223173, MR223174, MR297995, MR297996) Use adaptor bush SAB41 supplied.

NISSAN TECHNICAL ADVICE					
T/A1 400441-Extended 625mm,Compressed 382mm,Upp 48x12,Low 42x16---400442-Extended 374mm,Compressed 287mm,Upp 48x12,Low 48x14					
T/A2 400443-Extended 625mm,Compressed 382,Upp 42x12,Low 42x16					
T/A 3 When fitting 400460 Shock Absorber it may be necessary to slightly file/grind the Compression. Bumper Support Plate on the chassis for the larger diameter Shock to clear.					
T/A 4 36S405A Is now complete with welded Spring Seat.					
T/A 5 On Part Numbers 65423R & 65424L the distance from the weld on the Spring Seat to the top of the Lower Mounting Bracket is 138mm.					
T/A 6 On Part Numbers 65425R & 65426L the distance from the weld on the Spring Seat to the top of the Mounting Bracket is 160mm.					
T/A 7 Check the size of the Lower Mounting Bush - if 16mm supply 355304, if 19mm supply 355305.					
T/A 8 Has Eye Lower Mount					
T/A 9 Has Fork Lower Mount.					
T/A 10 The year model for Steering Dampeners is a guide only, there are 5 Steering Dampeners used. It is most important to check the extended and compressed lengths before fitting.					
27H400 Eye - Eye Compressed 339mm Extended 570mm.					
27H402 Pin - Pin Compressed 288mm Extended 485mm.					
27H403 Eye - Eye Compressed 343mm Extended 585mm.					
27H404 Ball Joint - Ball Joint Compressed 340mm Extended 550mm.					
27H500 Pin - Pin Compressed 315mm Extended 526mm.

TOYOTA TECHNICAL ADVICE					
T/A 1 Part Numbers 360350 & 360350S. If the Shock Absorber is too large in diameter it may be necessary to enlarge the hole in the Lower Suspension Member. 360350 = 43.6mm Diameter. 360350S = 33.0mm Diameter.					
T/A 2 It is advisable to check the vehicle height to determine if Raised Springs have been fitted. Jack the vehicle on the chassis with the Suspension at full droop, measure the distance between the Shock Absorber Mounts. Refer Numerical Listing					
T/A3 27H702 Ext 653mm-Comp 387mm Ball Joint/Ball Joint--27H706 Ext 662mm-Comp 419mm Pin/PIN					
T/A4 27H703 Ext 682mm-Comp 432mm Ball Joint/Ball Joint--27H706 Ext 662mm-Comp 419mm Pin/PIN					
T/A 10 Always check the condition of the rubber section of the Upper Strut Mount, it can cause knocking.					
T/A 11 400527 is available for use with Extra Raised Springs. Make sure travel requirements are correct before fitting. Specifications UPP EB2, LOW EB2, CO					
T/A 12 Make sure the Top Housing for the Shock Absorber is correctly located. If off-set the wrong way the Shock Absorber will hit the body.					
T/A 13 Check the extended length of the Shock Absorber. If 425mm use 400403, If 386mm use 360741.

TELAFLO - ULTIMA CROSS REFERENCE

AAP guarantees the Original Purchases against functional and / or material defects of the following:-

Ultima Shock Absorbers, Strut Cartridges, Strut Assemblies and steering Dampeners.

Australian Automotive Parts PTY LTD guarantee that Ultima Ride Control products are free from defects as a result of faulty manufacture and / or faulty materials as follows:-

- 1 Shock Absorbers used on Passenger Cars and Light Commercial Vehicles with a load capacity of less than 1000kg for a period of 36 (Thirty-Six) months from the Date of Sale to the User, or 100,000km, whichever occurs first.
- 2 Shock Absorbers used on Medium and Heavy Commercial Vehicles for a period of 12 (Twelve) months from Date of Sale to the User or 30,000km, whichever occurs first. (Includes 46000 XHD Series)
- 3 Only within Warranty Period and when Proof of Date of Purchase and distance the new Shock Absorbers have done, can be verified.
- 4 **WARRANTY EXCLUSIONS:-**
Shock Absorbers which are used on Applications, or fitted contrary to the information supplied in the Ultima Catalogue, or any subsequent
- 5 using the specified tools.
- 6 Shock Absorbers damaged as a result of an accident.
- 7 Shock Absorbers that have failed for reasons other than fair wear and tear during normal and proper use. Eg. Using the vehicle for Rally or Racing Sports, or purposes for which it was not designed.
- 8 Liability for any damages whether incidental, consequential or otherwise including Labour charges.
- 9 Wear and tear as a result of the re-use of parts such as Rubber Dirt Shields, damaged Bump Stops etc.
- 10 Reconditioned or recycled Shock Absorbers.
- 11 Shock Absorbers which are used on Modified Suspensions when fitment is not approved by AAP.
- 12 **COMPENSATION:-**
Compensation is limited to the replacement of the Shock Absorbers originally supplied to the User, and which are proven to AAP's reasonable satisfaction to have failed by reason of faulty manufacture and / or materials. AAP reserves the right to have units returned to
- 13 The replacement unit (S) will be warranted for the balance of the duration of the original Warranty Period.
- 14 AAP undertakes to credit the Stock list at current price applicable, when the Warranty Claim has been accepted.

This Warranty is expressed in lieu of all other Warranties implied by Common Law.

Models are sometimes changed during the listed Year of Manufacture and it is important that the full designation of the vehicle is given when ordering Ultima Shock Absorbers.

The preparation of this Catalogue has been carried out with every care and attention.
